PROFESSIONAL SUMMARY

Full Stack Web Developer specializing in designing and developing scalable web applications using React, Next.js, TypeScript, Python, PHP, and Supabase. Experienced in building government information systems, AI-powered applications, healthcare management platforms, and client-focused web solutions with an emphasis on clean architecture, responsive design, and intuitive user experiences. Passionate about delivering secure, high-performance software that solves real-world problems while continuously learning and adopting modern development technologies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Responsive Design

Backend: Flask, PHP, REST APIs

Databases: MySQL, Supabase, Firebase

Tools: Git, GitHub, Vercel, Railway, Hostinger, Figma

Experience

Full Stack Web Developer

Freelance & Academic Projects | 2023 – 2026

- Developed and deployed full-stack web applications for government, healthcare, and business sectors using React, Next.js, Python (Flask), PHP, MySQL, and Supabase.
- Designed responsive and user-friendly interfaces while implementing secure backend systems, REST APIs, and role-based authentication.
- Collaborated with clients to gather requirements, translate business needs into technical solutions, and deliver projects on schedule.
- Integrated cloud services, databases, and third-party APIs to improve application performance, scalability, and user experience.
- Optimized application performance, database queries, and responsive layouts across desktop and mobile devices.
- Managed the complete software development lifecycle, including planning, UI/UX design, development, testing, deployment, and maintenance.
- Utilized Git, GitHub, and modern development workflows for version control and collaborative software development.

PROJECTS

Legislative Legislative Records Management System (LLRM) – Digital Records Management System for Local Government

(Next.js, React, TypeScript, Supabase, Tailwind CSS)

- Developed a web-based legislative records management system to digitize ordinances, resolutions, and official documents for local government offices.
- Implemented advanced search, filtering, and document categorization, enabling faster retrieval of legislative records.

Hospital Management System (HMS) – Healthcare Information Management Platform

(Next.js, React, Supabase, Tailwind CSS)

- Developed a hospital management system integrating patient records, appointments, billing, and staff management.
- Implemented secure role-based authentication to protect patient information and streamline hospital workflows.

Ivan Soriano Photography Portfolio & Booking System – Client Portfolio and Online Reservation Platform

(Next.js, React, Supabase, Tailwind CSS)

- Developed a responsive photography portfolio and booking system with secure client authentication.
- Implemented private galleries, booking management, and inquiry features to improve client experience.

Digital Barangay Management System – Smart Community Management Platform

(Next.js, React, Supabase, Tailwind CSS)

- Developed a web-based barangay management system for resident information and public services.
- Implemented role-based authentication to enhance security and operational efficiency.

CERTIFICATIONS

- ITS Specialist – Software Development (2023)
- ISC² Certified in Cybersecurity (CC) (2023)
- Data Privacy Fundamentals – Coursera (2022)
- Information Security: Context and Introduction – Coursera (2022)
- WordPress Web Development for Beginners & Online Businesses (2025)
